Urdu, English

Interest

Bodybuilding, Playing computer games

Projects

HR Management System

(MERN Stack)

Developed a full-stack HR system with employee management, attendance, leave tracking, and role-based access using MongoDB, Express, React, and Node.js.

Inventory Management System

(Express.js, EJS & MongoDB)

Developed a full-stack inventory system with Express.js, EJS, and MongoDB, featuring product tracking, stock management, and CRUD operations.

E-commerce Website

(JavaScript, jQuery, HTML, CSS, Firebase)

Developed a full-featured e-commerce website with product listing, shopping cart, user authentication, and real-time database integration using plain JavaScript, jQuery, HTML, CSS, and Firebase.

Blog Website

(MERN Stack)

Built a full-stack blog platform using MongoDB, Express.js, React.js, and Node.js, featuring post creation, editing, commenting, and user authentication.

Blog Backend API

(.NET Core Web API)

Developed a RESTful backend for a blog platform using .NET Core Web API, implementing CRUD operations, authentication, and database integration.

WordPress & WooCommerce Websites

(Elementor, Astra, Wordfence, Yoast)

Developed and customized e-commerce and business websites using WordPress and WooCommerce, including product management, payment integration, and responsive design.

Vecci-rec (android app)

(Kotlin & Firebase)

Developed an Android application to manage client records and send timely vaccination reminders, improving follow-ups and vaccination compliance.
